Compassionate Help for the Discouraged Unemployed or UnderemployedBy Connie Neall do not casually toss out five star reviews, but this book is top drawer. Our family of well-educated, hard-working, dedicated employees has been hit hard by the recent economic downturn. So, I read with great interest. Here is what you will find: This is not a book by a detached expert. The author has spent decades in a hiring role in corporate America, but because he experienced the shock of losing his job -- and dared to share the emotional issues as well as the practical -- I found this book doubly helpful. He writes with authority and compassion; a rare mix that is greatly needed for those who have been unemployed or under employed for any length of time.Here are some of the specific things I appreciated and found most helpful~ Action points collected for you at the end of each chapter.~ Well chosen quotes provide snippets of encouragement.~ A chapter on whether you should choose going into business for yourself over seeking to return to the job market.~ He shares sage advice from people who have been through it, like this bit of wisdom that really helped my husband who shared this experience: "...a retired friend... said to me... "You will soon learn who your real friends are. Be prepared to be shocked by those you consider

to be close colleagues and associates. They'll act as though you never existed."~ Plenty of excellent, tried and true, up-to-date advice for TODAY's job search. I am gifting this to a professional friend who has been having a hard time searching for a job for a long time. Do you know someone who might benefit from your care and concern for their employment needs? Maybe someone who was laid off or let go from your company? If so, let them know you care by gifting them this book. Connie Neal, author of many books found at [...] 5 of 5 people found the following review helpful. This book is REALLY going to help! By I love books I recently left my previous job and am in the process of looking for other work. What I really like about this book is the actionable steps that the author has explained thoroughly. My favorite chapters are 4, 5 and 6. Have started my action plan of attack and am rewriting my resume. Didn't realize that you have 30 seconds to make an impact. So I'll be getting rid of the waffle at the start. If you are looking for a job or have just started a new one, this book is for you. When I do get the job of my dreams, I'll be revising the chapters on how to be a wonderful employee and dealing with different bosses. Thanks, this book was extremely helpful. 2 of 2 people found the following review helpful. Detailed By Barbara LI write a blog, Job Finding How To, strategies and tactics that bring success. I blog about what worked in my own job finding. It took me 18 months to find my present paid employment. Steve Matter, also, writes about what works in job finding. Both of us have experienced the fact that age discrimination is alive and well in America today. Mr. Matter not only speaks about this state of affairs, he, also, identifies what works in job finding. He gives excellent examples via story telling and visuals. His sample email about how to respond to business contacts after being laid off and his sample resume are detailed and professional. The action plans he includes with every chapter, especially the action plan for Chapter 2, cause one to think and thus be prepared for the various aspects of job finding. He has an excellent chapter on entrepreneurship and his Chapter 7, Personalities Styles of Your Boss, is a must-read for job keeping after one is found.
