Regis Sauger : Get Out of Credit Prison (Credit Education) before purchasing it in order to gage whether or not it would be worth my time, and all praised Get Out of Credit Prison (Credit Education):

Get Out of Credit Prison was written to assist those consumers that are facing credit issues or have suffered from credit issues. In the book, one will learn that possibly some of their debts are legally discharged, but some groups, purchase

these debts for pennies on the dollar and attempt to collect the entire amount. The danger is when they use the court system and the un-suspecting consumer ignores their shady efforts. This can result in a judgment for many years and it might have been avoided with the information contained in the book. One can learn how a ham sandwich in a medical facility can cost (\$ 750.00) YES, you read that correct. Understanding the billing procedure in the system can be invaluable. Another big help is "how to get rid of those NASTY PHONE CALLS" This is a very well written, easy to understand credit guidance book. It is an e-book and the authors goal is to pass on the many years of experience in the system.

From the Author This book was written as a result of the confusion in our consumer credit. Regis Sauger is considered one of the top credit educators in the US. Personal and professional contacts have resulted in tremendous exposure to various credit issues. One of the single most important items in the book is the "The thief that steals your money without a gun".
