Students who implement the strategies in this book will be light-years ahead of their peers in finding meaningful employment after graduation. The insider tips and Tuckers antidotes illustrate exactly what it looks like to get to work and take advantage of the opportunities afforded to students. This book also allows for introspection through well-thought-out exercises, and explains how to differentiate yourself from thousands of other applicants for a job or internship. This book is not only a tool for students. Parents, professors, ACADEMIC ADVISORS, or anyone who wants to guide a student towards success should read this book. Recent graduates or career changers will also find value in this book. Whether you are a pre med student, an aspiring CEO, or completely lost and wandering around campus with your eyes closed, this book will light a fire under your feet. 0 of 0 people found the following review helpful. Incredible resource for college students of any age or year. By NFJenkins  
This book is miles ahead of other guidebooks for college students. It contains mountains of incredible advice for college students of every age or year: the freshman who is looking for his first internship, the sophomore or junior looking to get an even better internship than their first one, and the senior looking to nail down their dream job. If you've read other guidebooks on getting jobs or internships - and you don't think you need any more advice - think again. This one has something for you (or someone you know). Buy it, read it, learn from it, and live it. Recommendation when reading: Pay VERY close attention to the Insider Tips. They are usually a couple paragraphs of information, but pack a TON of very, very useful information into those paragraphs. 0 of 0 people found the following review helpful.
