Even in an unhealthy economy, there are certain fields that continue to grow and thrive. Two of these are hair care and makeup. This guide to landing a job in hair care and/or makeup provides some incredible tips on navigating the competitive job market by developing a resume and cover letter that stand out. It is a terrific resource for any savvy job seeker looking for an edge.

From School Library JournalGr 7-10-Written in a clear, straightforward style, this series assumes readers have no prior knowledge of the featured vocations. In five or six thorough chapters per volume, the authors offer overviews of various fields and the choices students entering them need to consider. The chapters continue with the steps readers can do now to prepare, and what will be expected later. Finding a job, interviewing, paperwork, and what perspective workers will learn on the job are all discussed. The main texts can sometimes look squeezed and the spacing odd. The books contain attractive, captioned color photos; headings; fairly large font; and sidebars with additional information. (c) Copyright 2013. Library Journal.
