Studio Visual Steps : Google for Seniors: Get Acquainted with Free Google Applications: Google Earth, Maps, Reader, Docs, Sites, Chrome (Computer Books for Seniors series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Google for Seniors: Get Acquainted with Free Google Applications: Google Earth, Maps, Reader, Docs, Sites, Chrome (Computer Books for Seniors series):

0 of 0 people found the following review helpful. Buyer BewareBy jenny wrenFirst of all, I should have read the description more carefully. This is NOT for you if you own a Google Chromebook. It is only for Windows OS. It was also written in 2010, which makes it rather old for this type of text. I did read through several chapters anyway,

thinking I might give it to a family member. I found the illustrations just "okay", not very clear. It is also quite tedious in some descriptions. 0 of 0 people found the following review helpful. Not about Google Chrome By Thomas F. Loneragan Is not a beginners book for people looking to use Google Chrome. Covers Google apps but not the basics of using Chrome. I will give it to Goodwill as someone looking for a guide to the apps, which I never use, may find it useful. 1 of 1 people found the following review helpful. The cover picture on my book looks like a Viagra commercial By Bernie (xyzzzy) I can see why purchasers of this book can be confused. The ISBN 978-90-5905-2369 has been reused for a different book with the same name, I am holding a book that does not say the word Chrome on the cover. However it has the a couple of cuddlers in one chair; One hand is on the keyboard and I am not going to tell you where the other hand is. Yep this is 2010 a tad old for technology. However one thing is that it breaks you out of the mold of just using it for a one line search engine. The pictures are monochrome and a tad warped for their size. I was lucky as I did not want to see any Chrome stuff.

Brimming with step-by-step instructions and illustrative screenshots, this guide designed specifically for seniors provides detailed information on the free software and services provided online by Google. For beginners and more advanced computer users alike, this insightful resource shows how to perform tasks such as exploring the world, building a free website, browsing the internet, creating documents, and sharing web albums and calendars, by using the host of options available through Google. Since these applications are available on the internet, they will run the same on a computer with Windows Vista, XP, or 7, though a fast internet connection (DSL or cable) is required.
