Peter Harrison : Great Inventions (Illustrated Science Encyclopedia) before purchasing it in order to gage whether or not it would be worth my time, and all praised Great Inventions (Illustrated Science Encyclopedia):

Inventions have revolutionized our everyday lives in many ways, and this fascinating encyclopedia looks at the different types of human inventions, from the earliest energy-saving devices through to the internet and biotechnology.

About the AuthorPeter Harrison started as a painter at Glasgow School of Art before taking up a carer in publishing. He is the author of two children's information books on famous painters and is currently a freelance writer and editor. Chris Oxlade has worked as a writer and editor, generally in the field of science and technology, but also in the subject area of sports and hobbies. Stephen Bennington over the years, as well as continuing a career in artwork, he branched

into fashion design, especially knitwear, and has worked both in Europe and America. He now combines a love of art and fashion with his new found skills in computing.
