This is well done and thorough - a great at-your-fingertips reference guide to situational ministering as a Chaplain. Am recommending this and including this in our Chaplaincy Training Program at the National Association of Christian

Ministers. Once these ministry/counseling techniques are studied, this book services as a great refresher to review often - as well as to take with you "on the job". You can tell that those contributing to it are seasoned, experienced and thoroughly trained chaplains and crisis counselors. Highly recommend! 0 of 0 people found the following review helpful. Handling Disasters: Group's Emergency Response Handbook By Rev. Alan Hurricane, wildfire and flood workers live in a world that is always over run and overwhelmed. The rest of us are not exempt though. Group, along with the Salvation Army, provide a book that is an excellent resource for preparing yourself for the possibility of a crisis. It provides what to do and say along with what NOT to do and say. I have used as a text in teaching small groups and classes preparing local church chaplains with great success too. However, this little book is also a great source of information for those spontaneous ministers/workers on the ground who are overwhelmed and unprepared in a crisis. This is a book that an early responder could hand to someone and simply tell them to go. While not the best situation, this is better than no response. It could also help an unsteady volunteer become both a part of the solution and prevent mental injury from helping. This is one of a series of handbooks by Group. It is broad enough to be useful and specific enough to be "real". It is efficient, organized and clear. It is also not an exhaustive study on crisis management. Use it as a starting place for study and an easy reference when the adrenaline is running. Every church response, early response and firehouse should have a copy. Group's Emergency Response Handbook for Disaster Relief (Group's Emergency Response Handbooklet) 0 of 0 people found the following review helpful. Great Resource !!! By jabef This small book stays at easy access for me. It addresses many situations that happen on a regular basis. It offers excellent ministry ideas, care and counseling tips. It provides sections on what to say and what not to say in various circumstances. Some of the topics it addresses include: Death and bereavement, crisis of faith, isolation and loss of support system, suicide and stress and anxiety. I will probably buy another copy to put in my car. This is an excellent resource!

Authored in partnership with The Salvation Army! This rapid-response field manual is designed for volunteers who want to assist in the recovery efforts of hurricanes, floods, tornadoes, fatal car accidents, and more. Includes expert advice from disaster response professionals on what to say and do when you step on the scene of a natural or man-made crisis. What this resource offers... A practical, hands-on field manual to equip volunteers who want to help in the aftermath of a disaster.
