I do wish this had been available while i collected literature. One in a million book. [The second copy i gave to my supervisor/mentor]. In this definitive reference volume, almost fifty leading thinkers and practitioners of autoethnographic research from four continents and a dozen disciplines comprehensively cover its vision, opportunities and challenges. Chapters address the theory, history, and ethics of autoethnographic practice, representational and writing issues, the personal and relational concerns of the autoethnographer, and the link between researcher and social justice. A set of 13 exemplars show the use of these principles in action. Autoethnography is one of the most popularly practiced forms of qualitative research over the past 20 years, and this volume captures all its essential elements for graduate students and practicing researchers.
