**From Brand: Springer Publishing Company : Handbook of Theories of Aging** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Handbook of Theories of Aging:

1 of 1 people found the following review helpful. complex and dry By Diana Pierini The first chapter of this book resulted in the two of us students asking the professor if we could choose another book due to its stuffy, dry complexity. But we hung in there and by chapter 3 it started getting more readable. The book does cover the subject pretty thoroughly for its time (starting to get outdated now with all the newer theories coming out). However, all in all,

I would have enjoyed a newer version if one was available. To be fair, our professor says this book is the "gold standard" on the topic.

The long awaited sequel to Birren and Bengtson's landmark text, EMERGENT THEORIES OF AGING has arrived. Dedicated to James E. Birren, this volume continues to explore and expand upon the bases of theory-building and research design in aging. Renowned researchers examine biological, biomedical, psychological, and social science concepts and theories. In addition, this volume contains a new section that explores the potentials for successful interventions by applying theories to gerontological practice, public policy, and mental health and aging. This text is a valuable resource for gerontologists, academics, psychologists, and graduate-level students. Contributors include: James Birren, Gary Kenyon, Caleb Finch, Diana Woodruff-Pak, Paul B. Baltes, Margret Baltes, Laura Carstensen, Timothy Salthouse, Gisela Labouvie-Vief, Christine Fry, Dale Dannefer, Margaret Gatz, among others.

From the Back Cover" The long awaited sequel to Birren and Bengtson's landmark text, EMERGENT THEORIES OF AGING has arrived. Dedicated to James E. Birren, this volume continues to explore and expand upon the bases of theory-building and research design in aging. Renowned researchers examine biological, biomedical, psychological, and social science concepts and theories. In addition, this volume contains a new section that explores the potentials for successful interventions by applying theories to gerontological practice, public policy, and mental health and aging. This text is a valuable resource for gerontologists, academics, psychologists, and graduate-level students. Contributors include: James Birren, Gary Kenyon, Caleb Finch, Diana Woodruff-Pak, Paul B. Baltes, Margret Baltes, Laura Carstensen, Timothy Salthouse, Gisela Labouvie-Vief, Christine Fry, Dale Dannefer, Margaret Gatz, among others." About the Author Vern L. Bengtson, PhD, is AARP/university professor of gerontology emeritus and research professor, Edward R. Roybal Institute on Aging, School of Social Work, University of Southern California, Los Angeles, California. A senior statesman in gerontology, Bengtson is a world-recognized expert on the sociology of the life course, family sociology, social psychology, ethnicity and aging. He has been elected as president of the Gerontological Society of America and has been granted two MERIT awards for research from the National Institutes of Health. He has written or edited 17 books and published more than 260 research papers. Early in his career, Bengtson started the Longitudinal Study of Generations, a multigeneration and multidisciplinary investigation of families, aging, and social change, which now is in its 45th year of data collection from more than 350 multigenerational families. He has received research awards from the Gerontological Society of America, the American Sociological Association, the American Psychological Association, the National Council on Family Relations, and the Society for the Scientific Study of Religion. As the lead editor on the two prior editions of the Handbook of Theories of Aging, and coeditor of the book that preceded them, Emergent Theories of Aging, Dr. Bengtson has led the charge to transform gerontology into a field that is rich in both data and theories.
