Beverly Thorne : Hands-On Activities for Exceptional Students: Educational and Pre-Vocational Activities for Students with Cognitive Delays before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hands-On Activities for Exceptional Students: Educational and Pre-Vocational Activities for Students with Cognitive Delays:

5 of 5 people found the following review helpful. Every teacher needs this book! By Kathryn Like many teachers, I have ordered dozens upon dozens of books, hoping for the perfect book. For students with special needs, this is one of those perfect books! It has pages of activities. Each page lists the activity, shows a picture of it, describes the materials necessary, and how it is done. This is a great book for ideas for functional activities that are simple to make and use and actually teach something to the student. No theory here -- I read the book one night and was able to try most of the

activities in the classroom the very next day with materials I already had on hand. I have recommended it to every special day class teacher I have talked to. 0 of 0 people found the following review helpful. Hands on Activities By C. M. Vagnozzi This book is going to be extremely helpful to me this school year! 1 of 1 people found the following review helpful. Great resource for high school By lv2read Great ideas for someone who works with students with autism at the high school level. Wish there were more books like this one.

An excellent resource for educators teaching lower-functioning students! Packed full of activities designed to teach students how to work independently for designated periods of time. The skills addressed in this new book are essential for students hoping to gain employment in a sheltered workshop environment. There are over 70 activities included in this resource, addressing the following subject areas: Pre-vocational, Math, and Reading/Language skills. All activities are self-directed and facilitate independent functioning! A must-have for Special Education teachers.

About the Author Beverly Thorne is a graduate of Jacksonville State University, where she obtained multiple certifications in the field of special education. As an educator, she has worked with students of all levels with a wide range of disabilities.
