It has provided me with great insight into understanding the mental illness that is Hate. When I first read it I was interested in gaining an informed perspective on the subject, free from own personally biased and limited knowledge. I have returned to it several times for specific

guidance towards the resources Dr. Gaylin used to produce it and have always found it to be a concise collection of information to support my research. I would highly recommend it for anyone wishing to gain a thorough understanding of the subject matter. I purchased it because I can always use access to this knowledge. 2 of 15 people found the following review helpful. zionist propaganda portrayed as ScienceBy Nexus HexusGetting thru the first chapter is no problem. I would presume it would be a good book. instead I found that Hatred as a symptom is what the zionist and judaist populations have as an obsession of the holocaust to continue writing about it. Once you get past chapter 2 , read chapters from last to first.. On page 207 is a clear attempt to recontext the Freudian SuperEgo as the heritage supremacy of the religion of judaism over all other races INCLUDING Caucasians. Read it for yourself. The Trinitarian belief of id , ego and superego are transformed into a method of regarding infallibility to the preceding culture and justified murder of Jesus Christ as though he shouldn't have been forgiven (Matthew 18:21-22 . If Peter is to forgive 70 x7 times, guess who is to forgive 7 times and NOT call for crucifixion for entertainment? (betting lots))The book is a distractionary device; and not the big picture. A book to read before is Lynn Picknetts " The Secret History of Lucifer, AND John J. Robinsons' Born in Blood (history of FreeMasonry) and base conclusion after all three. It excludes the mention that the Torah censorship had led directly to the environment that Pakistani female Malala Yousafzai was nearly killed and sharia law created. Certainly that is a very recent event. Its been happening before. The belief that judaism is unjustly prejudiced is false. The group that has been longer oppressed up thru 1920 than Jews is Women by Jews. As we know from Nuremberg , there is no such thing as 'just following orders'. Likewise, when continuing sexism from Egyptians, there is no innocence in male patriarchy prejudice. The repetition of the Mitzvot prayer ' thank you for not making me a slave, a woman , or a gentile' 3 x daily for 1600 years is certainly a brain wash that all 3 demographics would summarize into on stereotype. That stereotype of females continued subordination thru into the catholic prejudice against female clergy even though 'jesus' did have female priestesses and apostles.. All of the male apostles were canonized saints but none of them joined him THAT particular day in crucifixion. The obsession upon rereading the holocaust specific to THIS book is to create criticism of Jews as a symptom rather than a socially justified manner of their own contribution to crime , prejudice and injustice .To generate such a disgusting false science stems from lack of acknowledgement that Lilith not being in the torah or Old testament has continued sexism thru the previous 3400 years. if the Divine creation of Adam is so important , why then is the Creation of Lilith glossed over if not myth .. and infact that hatred is the obsession about the Holocaust to embellish the acts of genocide as though they even need to be? This book is a quackery. It seldom finds other examples in larger than a paragraph. 3 of 5 people found the following review helpful. ExtraordinarioBy Edwin BrachoEste libro debe ser leído por mucha gente en Venezuela donde lo descrito por el autor se aplica en gran medida en quienes ocupan cargos pblicos en la actualidad. El planteamiento del autor con respecto a la envidia y el resentimiento calzan a perfección con los actuales gritos emitidos por los políticos de turno. Muy bien escrito, exacto, serio, reflexivo, con argumentos científicos, elaborado por un psiquiatra docente universitario. Realmente recomiendo este libro aunque escrito en Inglés es til leerlo, sobre todo por quienes aman el actual régimen de cosas. This book should be read by many people in Venezuela because what is described by the author applies heavily on those who hold public office today. The author's approach with regard to the envy and resentment fits perfectly with the current cries emitted by politicians of the day. Very well written, precise, serious, reflective, with scientific arguments made by a psychiatrist, university professor. I highly recommend this book although written in English is useful to read it, especially by those who love the current regime of things here in this small village.

We all get angry at the built-in frustrations and humiliations of everyday life. But few of us ever experience the intense and perverse hatred that inspires acts of malignant violence such as suicide bombings or ethnic massacres. In *Hatred*, Dr. Willard Gaylin, one of America's most respected psychiatrists, describes how raw personal passions are transformed into acts of violence and cultures of hatred. Such hatred goes beyond mere emotion. *Hatred*, Gaylin explains, is a psychological disorder a form of quasi-delusional thinking. It requires forming "a passionate attachment," an obsessive involvement with the scapegoat population. It is designed to allow the angry and frustrated individual to disavow responsibility for his own failures and misery by directing it towards a convenient victim. Gaylin dissects the mechanisms by which cynical political and religious leaders manipulate frustrated and deprived people, leading to the acts of mass terror that threaten us all. Step-by-step, he leads us into an understanding of the psychological pathway to acts of terrorism an understanding that is an essential to survival in a world of hatred. *Hatred* is a masterwork in Willard Gaylin's life-long study of human emotions. Writing for the educated lay audience in the eloquent, accessible language of his bestsellers *Feelings* and *Rediscovering Love*, he takes us to the very roots of hatred.

From *Booklist* Gaylin, a professor of clinical psychiatry, attempts to place hatred at the center of our contemporary crises concerning Palestine and al-Qaeda. He examines hatred as a mental disorder, going beyond its normative emotional connotation into delusional thought patterns. Passionate, but irrational, attachment to a scapegoat population allows the hater to deny responsibility for failures and frustrations. Gaylin breaks down the mechanics of this process and integrates it with the risk associated with politicians and religious leaders able to manipulate such deprived

persons to their own end. But Gaylin's position ignores the objective conditions of Palestinians or members of al-Qaeda that justify their hatred. As his analysis is based on a clinical model, the assumption is that objective application is possible. Yet, at points Gaylin asserts that the hatred of Americans and Israelis is based on mere jealousy and envy, and that hatred results from deficiencies of the haters. Such an analysis may be too simplistic to apply in the infinitely complicated quagmire of the Middle East. Vernon Ford Copyright American Library Association.
