**Paul Wayne Gantt : Hazardous Materials: Regulations, Response Site Operations** before purchasing it in order to gage whether or not it would be worth my time, and all praised Hazardous Materials: Regulations, Response Site Operations:

0 of 0 people found the following review helpful. No DumpingBy grimsdottirExcellent read. As good as any book on hazardous materials management could possibly be. The Superfund stuff is interesting. Some of the OSHA and NIOSH stuff is too. All in all, I suppose taking a logistics specialization -- which required this book -- instead of some fun electives wasn't really worth it. I recommend taking applied art classes instead.0 of 0 people found the following review helpful. Five StarsBy CustomerGood book. Hard to get.0 of 0 people found the following review helpful. Schnepf's Book is the HazMat Training StandardBy James S.It's the "standard" for HazMat training. Recommended.

All the regulatory requirements associated with the handling, clean-up and storage of hazardous materials

(HAZWOPER) are brought together in this reader friendly book. Revisions to this edition include expanded regulations for dealing with an intentional release of a hazardous material in a terrorist incident, as well as pre-emergency plans for hazardous materials operations and response programs needed to effectively deal with natural disasters. Considered by many as an authoritative, comprehensive guide to Hazmat operations, this book examines OSHA regulations, risk evaluation, incident management, hazardous site operations, and more in order to effectively train hazmat responders.

Understanding the Hazardous Materials Regulation Maze. Introduction to Hazard and Risk Assessment. Health and Toxicological Hazards. Physical Hazards and Hazard Classes. Hazardous Materials Identification Systems. Principles of Respiratory Protection. Personal Protective Equipment. Principles of Decontamination. Site and Incident Management. Planning Hazardous Materials Cleanup and Response Activities. Monitoring and Sampling. Other Hazards in Cleanup and Response Activities

About the Author Paul Gantt is the President and founder of Safety Compliance Management, Inc (SCM). Paul is a retired Fire Chief Officer with over 35 years experience in the Emergency Response and Safety fields. In addition to the long list of positions held in the fire service, Paul is a lifetime member and past President of the Northern California Fire Training Officer's Association. He is a Certified Safety Professional, a Registered Environmental Assessor and holds a degree in Public Administration. Through SCM, Paul develops and delivers training programs in the area of occupational safety and health. He also provides consultation services, including Expert Witness work on regulatory compliance issues. He is certified by the State of California Office of the State Fire Marshal, Governor's Office of Emergency Services, Federal Emergency Management Agency, California EPA and the University of California to provide a wide array of training programs in areas including hazardous materials handling and response, emergency preparedness and response, occupational health and safety, and regulatory compliance.
