Steven T. Katz : Historicism, the Holocaust, and Zionism: Critical Studies in Modern Jewish History and Thought before purchasing it in order to gauge whether or not it would be worth my time, and all praised Historicism, the Holocaust, and Zionism: Critical Studies in Modern Jewish History and Thought:

1 of 1 people found the following review helpful. Most important topics in Judaism today By Robert New EnglandIn

this book Professor Katz discusses the most important topics in Judaism today. Besides containing papers on Franz Rosenzweig and Abraham Joshua Heschel, Katz discusses the role of racial antisemitism in Germany after WWI; outlines and analyzes the issues of comparing the Holocaust to other historical events, such as the mass witch burnings of the middle ages, black slavery, the decimation of North American Indians, the Nazi assaults on Gypsies and homosexuals, and Polish and Ukrainian losses during WWII. Katz discusses the various ideas concerning the uniqueness of the Holocaust, and more theological responses to it.

"[Of] the 12 well-crafted essays in this volume...the most useful are those dealing with the Holocaust." #151 Choice
"Especially recommended for college-level students of Jewish history and culture." The Bookwatch
This is a critical exploration of the most repercussive topics in modern Jewish history and thought. A sequel to Katz's National Jewish Book Award-winning study, *Post-Holocaust Dialogues*, this book identifies the main issues in the contemporary Jewish intellectual universe and outlines a larger, more synthetic understanding of contemporary Jewish existence.

"This splendid collection opens up a whole new field. Longmore and Umansky define it, explain why it is urgent for us to know about it, and provide fourteen fine examples of it, ranging all across American history, by as many authors. This is not your father's old-time medical history--it's a broader, brilliant enterprise." -Walter Nugent, University of Notre Dame
"Historians of medicine and technology will find this book an interesting introduction to a highly politicized and novel area of scholarship. This work should inspire research projects into more diverse and less categorized areas of disability." -"Technology Culture", "A cause for celebration. The insights popping off of each page are rich, compelling, and memorable. Taken together, these essays hold as much promise for remaking general understanding of the American past as pathbreaking works in women's history and African-American history. By bringing to center stage the experiences of so many who have been previously ignored or degraded, and by exploring how images of disability color American values and politics through time, this work invites students, scholars, and citizens to understand the world more deeply and more capaciously." -Martha Minow, Harvard University
"The essays introduce into the historical record a diverse group of people whose views and experiences have been largely excluded, challenge conventional notions of bodily integrity, and represent an important new subfield in American history from which we can expect rich and exciting innovation." -"The Historian", "With this work, Longmore and Umansky offer historians, sociologists and other readers intrigued by this area of scholarship an opportunity to understand disabilities as broader and more complex than a single, generic and primarily medical category." -"Publishers Weekly", About the Author
Steven T. Katz is Slater Professor of Jewish and Holocaust Studies and former Director of the Elie Wiesel Center for Judaic Studies at Boston University. His many publications include *The Holocaust in Historical Context*.
