Professor Uriel Cohen ArchD, Dr. Gerald D. Weisman PhD : Holding On to Home: Designing Environments for People with Dementia (Johns Hopkins Series in Contemporary Medicine and Public Health) before purchasing it in order to gage whether or not it would be worth my time, and all praised Holding On to Home: Designing Environments for People with Dementia (Johns Hopkins Series in Contemporary Medicine and Public Health):

In this pioneering book in the newly emerging field of architectural design and dementia, Uriel Cohen and Gerald Weisman set forth a program of practical design principles linked to specific therapeutic goals. People with dementia live in environments ranging from their own homes to community-based group homes and long-term care facilities. Holding On to Home addresses key issues for the planning and modification of all these settings. The book is equally useful to caregivers, nursing home and adult day care planners and administrators, architects, and interior designers, as

well as to students and practitioners of geriatrics and gerontology.

"Amplly and attractively illustrated, the book is full of good, specific and usable ideas, with examples of their implementation... Worthwhile even for tight-budgeted libraries, or for the bookshelf of units caring for the demented, and it has much that would be of value to carers in private households. Strongly recommended." -- Age and Ageing
