Dona Reese : Hospice Social Work (End-of-Life Care: A Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hospice Social Work (End-of-Life Care: A Series):

2 of 3 people found the following review helpful. Go-To TextBy DeborahBeen practicing social work for 20+ years now decided to try hospice social work - starting my new job this coming Monday. Bought several books about hospice social work to try to prepare for my new job. This book is fantastic. Well written covers all topics I can think of that I'm going to encounter. I'm so glad the the author took the time to write this book. I'm highlighting just about every paragraph as I read - it will definitely be my go-to guide. There is a tool called SWAT she clearly discusses how

to use when working with clients that I plan to use to try to be effective. Much gratitude to the author!

Great resource

The first text to explore the history, characteristics, and challenges of hospice social work, this volume weaves leading research into an underlying framework for practice and care. A longtime practitioner, Dona J. Reese describes the hospice social work role in assessment and intervention with individuals, families, groups, organizations, and the community, while honestly confronting the personal and professional difficulties of such life-changing work. She introduces a well-tested model of psychosocial and spiritual variables that predict hospice client outcomes, and she advances a social work assessment tool to document their occurrence. Operating at the center of national leaders' coordinated efforts to develop and advance professional organizations and guidelines for end-of-life care, Reese reaches out with support and practice information, helping social workers understand their significance in treating the whole person, contributing to the cultural competence of hospice settings, and claiming a definitive place within the hospice team.

This new book significantly adds to the growing literature on social work and end-of-life care. Social work educators, clinicians, and researchers would be well served utilizing this comprehensive text. Dona J. Reese provides a historical perspective for new hospice social workers, but also offers substantial content for the seasoned team social worker. The chapter on self-care should be required reading for all hospice/palliative social workers. (Sherri Weisenfluh, LCSW ACHP-SW, Hospice of the Bluegrass)
This book is well organized and readable and benefits from occasional examples of individual cases, sometimes from the author's own experience. (Choice)
About the Author
Dona J. Reese is an associate professor at the School of Social Work, Southern Illinois University. She is a former hospice social worker and former Social Worker Section Leader for the National Hospice and Palliative Care Organization, and she has worked with colleagues to advance the field through the National Hospice Social Work Survey and the Social Work Assessment Tool (SWAT).
