**From Brand: Princeton Univ Pr : Labor in the Public and Nonprofit Sectors (Princeton Legacy Library)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Labor in the Public and Nonprofit Sectors (Princeton Legacy Library):

Originally presented at a Conference on Labor in Nonprofit Industry and Government held at Princeton University, these studies are the first to provide an economic discussion of the public sector labor market. Melvin Reder examines the effect of the absence of the profit motive on employment and wage determination in the public sector. Orley Ashenfelter and Ronald Ehrenberg estimate the elasticities of demand for various types of labor employed by state and local governments. Theoretical ideas about behavior in nonprofit industries are employed by Richard Freeman to study the higher education industry. John Burton and Charles Krider try to predict the incidence of strikes in the public sector, while Donald Frey presents a model of the behavior of school boards in hiring faculty. The magnitude of the extra wage received by unionized public employees is compared by Daniel Hamermesh to that of private unionized workers in the same occupation. Originally published in 1975. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them

in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
