from many different disciplines is both impressive and generous spirited while the down-to-earth examples are practical, focused and grounding. Jungians could read this book for its empowering and containing principles (pages 61-80) of living life-as-career. Miller-Tiedeman's principles bring Jung's theoretical constructs into everyday, concrete and therefore, workable guidelines. Teachers and students could read this book for its clarity of layout, suggestions for deepening the teachings as well as broadening the awareness. Last, but far from least, Oprah Winfrey and her legions could read this as a primer for embracing the spirit. Thank you, Anna Miller-Tiedeman.

New Careering is an innovative approach to career counselling which advocates a theory of life, not job as a career. This is a concise explanation of the theory with case studies and discussion points.

Not only does this monumental work put past career theories into perspective, it also gives us a new theory - one that becomes more plausible, personal, real and exciting as it is experienced.... It is impossible to read this book without internalizing it.. Anita M. Mitchell, EdD, President, Alternatives
