dissertation writing intensive. But, it arrived 3 weeks later than scheduled. It looks good, but disappointed I didn't have it for the main purpose of buying it. When I work on Chapter 2 I am sure I'll be able to use it. 0 of 0 people found the following review helpful. But very informative and great. By David M. Penn. Bought it for school, much cheaper than the university's website. But very informative and great content. 0 of 0 people found the following review helpful. Great Book! By Rene Suarez. Great Book! Great resource! Met my expectations! Arrived by anticipated date! Very useful book! I would strongly recommend the book!

This book is designed to help you achieve one specific goal. It's not designed to give you the philosophies of conducting research. It's not designed to give you a background in a specific academic discipline or a specific topic. It's not designed to give you theory. It's designed specifically to instruct you in the practicalities of the writing process used to create strong, thorough, and potentially bulletproof literature reviews. This book is the culmination of years of research experience. It's also the culmination of several years of teaching writing and critical thinking to doctoral students. Although it began as a tool for doctoral students, it has been expanded to be useful for everyone from senior high school students through doctoral candidates working on developing their first literature review or a larger literature review than they normally develop. It has been created for everyone from academics to new business entrepreneurs with good ideas who are trying to write their first reviews to support the new idea they're proposing.

About the Author Paula Dawidowicz has over 15 years of experience helping higher education students succeed at critical and higher order thinking, writing, and argumentation, including almost 10 years as university faculty and dissertation supervisor. She's worked on analysis of program and policy, conflict, social interactions, and organizational and systems thinking since 1973 in everything from international to local environments. Starting with high school debate, she ultimately earned a Ph.D. with a focus on research methods, educational sociology and anthropology, and development of higher order thinking skills. Since then, she's held positions conducting research or instruction at several higher education institutions. Paula uses a "Grandma Moses style" of simple, direct information delivery filled with analogies and descriptive illustrations. Her books, articles, and tutorials share insights and techniques using this "Grandma Moses style" that makes them accessible to everyone.... [Read More](#)
