From Library JournalThis is a splendid collection of 11 essays by African American biblical scholars; the introduction puts the essays, and the consultation out of which they grew, into context. The essays consider biblical authority, African American sources for enhancing biblical interpretation, and the issue of race in the Bible. They also offer reinterpretation of specific biblical texts, while revealing the role blacks played within the Bible. These essays are important for both scholars and general readers, making the book essential for many libraries. Copyright 1991 Reed Business Information, Inc.
